

Director of Clinical

We are excited to bring a new optometrist to our team here at SynergEyes: a motivated individual who will pioneer new innovations for the company and push beyond the boundaries of what's possible with contact lenses.

The Director of Clinical Studies is responsible for all aspects of clinical studies at SynergEyes. This includes but is not limited to:

- Writing all clinical protocols and when necessary obtaining IRB approval
- Recommending outside studies
- Negotiating outside studies
- Coordinating and driving outside studies
- Filling the role of primary investigator on in-house studies
- Performing in-house evaluations on new products
- Performing in-house studies on new products

The ideal optometrist for this position is capable in both non-clinical and clinical roles, and is hungry to do more than just see patients during the day. We're looking for someone who enjoys variety and a challenge, and who will enjoy taking on a role that is diverse in its scope while utilizing their degree, knowledge, and experience to impact the world of patient care in a meaningful way.

One of the major benefits of this position is the scheduling flexibility that comes with the role. As we say at SynergEyes, "Our contacts are rigid, but we aren't."

Supervisory Responsibilities:

- Responsible for all Clinical employees

Education and Experience Requirements:

- Licensed Optometrist
- 2-5 years of experience with Rigid/Scleral contact lens fitting is preferred

We are willing to train the right individual on all of the functions below. If you have the right desire and willingness to learn and develop as a professional, you will be able to grow into this role.

Essential and Non-Essential Responsibilities:

- Responsible for all Clinical operations
- Communicates all aspects of Clinical operations to senior management
- Fit and analyze new designs on internal patients
- Function as a team member as well as team leader
- Drive team to find the most direct path to project completion
- Work with Quality/Compliance/Regulatory to find the most direct path to regulatory approval
- Develop clinical protocols and IRB submissions through personal contributions or a subordinate
- Execute internal clinical studies and drive the management of external clinical studies
- Accept new Clinical projects from senior staff and provide a detailed response regarding resource and manpower requirements
- Present new Clinical study suggestions to senior staff
- Negotiate contracts with consulting firms to perform research studies
- Continually review department staffing and take appropriate action
